## B1202 AND MORAVIAN 37 SLIP IN POPULARITY BUT STILL LEAD ALL BARLEY VARIETIES

**B1202** continued to reign as the favorite barley variety planted in Wyoming in 2004 with Moravian 37 the second choice. However, both were less popular than in 2003. B1202 topped the State for the thirteenth consecutive year with an estimated 27,900 acres in 2004. This variety accounted for 43 percent of malting variety seedings and 33 percent of Wyoming's total barley acreage. In 2003, 38 percent of the total barley acreage or 33,800 acres was seeded with B1202. **Moravian 37** was the second most popular variety with 15,200 acres seeded, accounting for 23 percent of the malting barley and 18 percent of the State's total barley acres. A feed barley variety was again among the top three varieties. **Haybet** was the third most common barley variety in Wyoming during 2004 with 5,900 acres planted. Haybet was estimated to comprise 31 percent of the feed barley acreage and 7 percent of the total barley acreage.

2/ Other feed and malting varieties reported with less than one percent of the total for 2004 include 1127, 9221, C65, Conlon, Galena, Hector, Legacy, Otis, Statehood, Tradition, and Washford. Unknown varieties are excluded.

\*Revised

Wyoming barley producers planted an estimated 85,000 acres to all barley varieties in 2004, down 5,000 acres from 2003. The Northwest District had 59 percent of the barley acreage in 2004, compared with 60 percent last year.

Malting varieties accounted for 65,700 acres or 77 percent of the total.

Acreage planted to feed barley totaled 19,300 acres, 23 percent of Wyoming's total barley acreage. **Baronesse** was the second most common feed barley in 2004, accounting for 3,700 acres or 19 percent of the total feed barley.

The Barley Variety Survey was conducted throughout the month of June by the Wyoming Statistical Office of USDA NASS via phone and mail. The American Malting Barley Association, Inc. provided the funding for this survey. We thank the Wyoming producers who voluntarily provided information that led to these estimates.
